Projects

SpotifyKaraoke *React.js, Spotify API, Genius API*
- React web application displaying real-time song lyrics allowing for playback control. *github.com/ianyyang/Spotify-Karaoke*
- Calls and consumes the Spotify and Genius RESTful APIs in order to fetch current playback information, user playlists, control playback, and store song web page URLs.
- Web scrapes the song web page on Genius.com and parses through the HTML data for song lyrics.

SpotifyQ *React.js, Spotify API*
- React web application tracking real-time musically-related statistics during listening sessions, showcasing *github.com/ianyyang/SpotifyQ*
  them to appropriately encapsulate your latest relevant listening history.
- Calls and consumes the Spotify RESTful API in order to collect and display user profile and session statistics in real-time, and to fetch and display music data.

Education

University of Toronto, St. George Campus *Toronto, Canada*
