Work Experience

SELECT Labs Inc (DoiT Intl)

Toronto, Ontario

Senior Product Engineer

Apr 2025 – Present

- Established and owned E2E infrastructure and reliability standards, serving as primary escalation for failures. Took green runs from **80%** to **>99%** and reducing the flaky/fail-test rate **>80%** (to 0.36%) while growing the suite **>70%**, within the first year.
- Owned query performance end to end by building telemetry, dashboards, and alerting. Defined the process and continuously tuned the runbook for tracking and responding to regressions, escalating repeat patterns to larger performance initiatives.
- Built Custom Dashboards with a drag-and-drop canvas, sharing, and scheduled digests to Slack, Teams, and email via a headless capture service. Built Pivot Tables with collapsible drill-down rows for standard tables and dashboards.
- Architected and shipped an activity feed system (comments, mentions, subscriptions) across all resources, on an SRN-based identification layer unifying user and system-driven state changes. Shipped a provider-agnostic ticket linking system (launched with Jira) that syncs into the feed.
- Shipped a redesigned monitors experience (overhauled destinations, bulk editing, anomaly alerting). Built Budgets from 0-1 with a Top Spend Contributors drill-down and extended Monitors to alert on multi-threshold budget spend.
- Helped consolidate legacy design system resulting in a component library of **>90** components and a semantic color token system, accelerating the launch of dark mode app wide.

Faire Wholesale Inc

Toronto, Ontario

Intermediate Software Engineer

Nov 2021 – Apr 2025

- Drove a **50%** increase in mobile app installations by leading full-stack development of contextual nudges on high-traffic pages, optimized user flows, and collaborating with product designers. Partnered with infrastructure teams to mature Conductor and Builder.io platforms, improving scalability. Conducted end-user studies to inform data-driven design decisions.
- Reduced monthly shipping costs by **>65%** by transitioning a free shipping subsidy to a co-funded subsidy program, leading a **4**-engineer frontend team over a **3**-quarter implementation. Collaborated cross-functionally with the Insider team via bi-weekly syncs and engineering design docs.
- Increased Open With Faire applications by **>35%** by redesigning the application form to include soft credit checks and reduce friction, leading a **2**-engineer team. Contributed to the development of V2, automating the underwriting process using a third-party credit reporting API to improve efficiency and scalability.
- Improved marketing email subscription rates by **10%** by implementing an email opt-in nudge on the front page, leading a **2**-engineer team. Collaborated on engineering design docs to plan for future SMS opt-in functionality, to ensure scalability.
- Mentored **2** co-ops to achieve top performance scores by creating growth plans, conducting weekly 1:1s, and guiding them as they led and launched significant projects.

JANA Corporation

Aurora, Ontario

Intermediate Software Engineer

Aug 2020 – Nov 2021

- Led and mentored a **5**-engineer frontend team by directing, planning, and developing flagship enterprise software Lantern to meet multiple version release deadlines, generating **$3+ million** annually in licenses.
- Led and organized sprint retrospectives, strengthening team cohesivity, communication, and planning by empowering the team to make continuous and procedural improvements through actionable items.
- Reduced development time by **25%** by coupling processes and hand-offs between Lantern developer/QA teams.

Skills

Languages	TypeScript/JavaScript (ES6+), Python, SQL, HTML/CSS
Frontend	React, Next.js, SWR, Playwright, React Testing Library, Tailwind, styled-components, Sass, Storybook
Backend & Data	FastAPI, SQLAlchemy, PostgreSQL, Snowflake, Dagster, Pytest, Pydantic, Alembic, OAuth/webhooks
Tooling	Claude (MCPs), PostHog, Bugsnag, GCP, Terraform, GitHub Actions, Git, Figma, Jira

Education

University of Toronto, St. George Campus

Toronto, Canada

Honors Bachelor of Science in Computer Science & Statistics

June 2020
