Work Experience

SELECT Labs Inc

Toronto, Ontario

SENIOR PRODUCT ENGINEER

Apr 2025 – Present

- Established and owned E2E infrastructure, monitoring, and reliability best practices, defining standards and serving as primary escalation for failures. Built out the majority of the platform's E2E coverage across all core workflows.
- Architected and shipped a comments & activity feed system supporting collaborative commenting across all resources. Designed and built an SRN (SELECT Resource Name)-based identification layer to standardize event attribution and enable a unified timeline of user and system-driven state changes.
- Owned redesign of usage groups experience, consolidating fragmented spend allocation workflows into a unified interface and introducing a net-new uncategorized spend manager eliminating multi-step navigation. Crafted Snowflake queries to power visual spend categorization breakdowns.
- Built favorites & folders system from 0-1 with lexicographic ordering, optimistic updates, drag-and-drop list management, and deep integration across product surfaces to improve manual bookmarking workflows.
- Shipped a redesigned monitors experience on a 4-engineer team, implementing form state management, validation logic, API integration, and contextual navigation, improving flexibility and usability of observability alerts.
- Changelogs:** Comments & Activity Feed | Usage Groups V2 | Favorites & Folders | Monitors Experience V2

Faire Wholesale Inc

Toronto, Ontario

INTERMEDIATE SOFTWARE ENGINEER

Nov 2021 – Apr 2025

- Drove a **50%** increase in mobile app installations by leading full-stack development of contextual nudges on high-traffic pages, optimized user flows, and collaborating with product designers. Partnered with infrastructure teams to mature Conductor and Builder.io platforms, improving scalability. Conducted end-user studies to inform data-driven design decisions.
- Reduced monthly shipping costs by **>65%** by transitioning a free shipping subsidy to a co-funded subsidy program, leading a **4-engineer** frontend team over a **3-quarter** implementation. Collaborated cross-functionally with the Insider team via bi-weekly syncs and engineering design docs.
- Increased Open With Faire applications by **>35%** by redesigning the application form to include soft credit checks and reduce friction, leading a **2-engineer** team. Contributed to the development of V2, automating the underwriting process using a third-party credit reporting API to improve efficiency and scalability.
- Improved marketing email subscription rates by **10%** by implementing an email opt-in nudge on the front page, leading a **2-engineer** team. Collaborated on engineering design docs to plan for future SMS opt-in functionality, to ensure scalability.
- Mentored **2** co-ops to achieve top performance scores by creating growth plans, conducting weekly 1:1s, and guiding them as they led and launched significant projects.

JANA Corporation

Aurora, Ontario

INTERMEDIATE SOFTWARE ENGINEER

Aug 2020 – Nov 2021

- Led and mentored a **5-engineer** frontend team by directing, planning, and developing flagship enterprise software Lantern to meet multiple version release deadlines, generating **\$3+ million** annually in licenses.
- Led and organized sprint retrospectives, strengthening team cohesivity, communication, and planning by empowering the team to make continuous and procedural improvements through actionable items.
- Reduced development time by **25%** by coupling processes and hand-offs between Lantern developer/QA teams.

Skills

Languages	TypeScript/JavaScript (ES6+), Python, Kotlin, HTML/CSS
Frontend	React (Hooks, React Query, MobX, Redux), Tailwind, styled-components, Sass, Storybook
Backend & Data	FastAPI, SQLAlchemy, Pydantic, Alembic, PostgreSQL, MySQL, RESTful APIs
Tooling	React Testing Library, Jest, E2E (Cypress, Playwright), Pytest, Git, CI/CD (GitHub Actions, Jenkins), Figma, Jira

Education

University of Toronto, St. George Campus

Toronto, Canada

HONORS BACHELOR OF SCIENCE IN COMPUTER SCIENCE & STATISTICS

June 2020
